

We offer design and implementation of the Russian language training program. This training will be tailored to the professional needs of the employee/s and conducted in person, following a learner-focused approach.

Below are a few key points regarding the course:

Training format	Individual online classes
Cost per 60 min class	EUR 35 per one person face to face class EUR 18 per one person – class for two EUR 13 per one person – class for three
Training schedule	Two classes per week unless agreed otherwise
Languages of instruction	English, Russian

Priority is given to speaking and listening, which is achieved through an intensive interactive learning process.

With more than 25 years of experience in delivering customized trainings in Russian as a foreign language to professionals, operating abroad in field missions in the

realms of diplomacy, international development, and business consulting, we have developed and refined a unique methodology.

Along with traditional methods, such as verified textbooks and workbooks with exercises, this methodology actively involves a set of interactive materials. For each stage of the training program there is a wide range of original Didactic Media Studio publications, based on the gamification principle: 'analogue' language learning games and visualization tools. This vast toolbox is complemented by an up-to-date collection of digital content, including audio-visual material and interactive web-based content.

Sincerely,
Mag. Irina Solonkova, founder and director
Didactic Media Studio S.R.L.
